Leaflets are a great way to raise your company's profile. A cohesive design and brand image teamed with interesting copy and impressive print materials can really help to inform your target market and generate new business. We can print them according to your data, or we design them to suit your idea and your business and products.

First you have to define your target group and then choose technology and circulation accordingly. We can print any size or volume of flyers on a huge range of stock. Flyers can be printed on gloss, silk or recycled paper stocks. They can be folded to make mini brochures or cut to a specific shape to give the design a unique appearance. We'll help choose the right papers and finishes.

For smaller circulation, up to 1000 pieces, digital print is better suited, since it allows a wide variability of the language choices, paper types and formats with high quality of finishing. Thickness of the paper varies from 80 to 350 grams according to the desired quality of your prints.

We can offer also special finishes – laminated covers, spot UV images. You can add a die-cut pocket inside the back cover of your brochures to add some extra information (e.g. price lists, special offers etc.) or we can cut out the desired shape, or create extra spot UV image for underlining the spots. It's all possible and we'll tailor each project to suit your budget and make sure you get the very best return on your investment.
