

We create and produce advertisement banners and billboards of all sizes. Most often used material is Komatex – with excellent firmness and all whether conditions resistant. We use latest and most advanced technologies to give you the most vibrant colours and highest detail possible.

We offer also window films advertisements. They are see-through from inside out, but keep your privacy from outside. We also offer *mesh* technology.

Favourite ones are boards with metal, silver, gold, copper or stainless steel look boards.
